

Iris Investigation Report

---

[UNC 1151 domains](#)

*May 20, 2021*

FireEye group UNC 1151 appears state-sponsored and spreads anti-NATO messaging. According to FireEye, a significant part of this group's TTPs includes credential harvesting, and many of the domains in this report substantiate that. This infrastructure is current as of late May 2021.

## Iris Investigative Report

This document presents the indicators and analysis discovered during an Internet investigation made possible by the DomainTools Iris Investigative Platform.

### Data Sources

Except where noted, all data comes from open sources of intelligence, including Whois records, website crawling, and interactions with the Domain Name System (DNS).

### Current Search Hash

*Copy and paste this hash into the 'Import A New Search' window in Iris to interact with these search results.*

## Investigative Pathway

Step	Criteria	Notes	Results
0	Domain in "com-verify.site, com-validate.site"		2
1	Domain in "com-verify.site, com-validate.site" [ OR ] Registrant Organization matches "OOH"	Pivoting on registrant organization "OOH" gives us close to 1,000 domains. Undoubtedly some of them are unrelated to UNC 1151. Many are also fairly old.  - Timothy Helming @ Thu, May 20, 2021 10:36 AM	990
2	Domain in "com-verify.site, com-validate.site" [ OR ] Registrant Organization matches "OOH" [ AND ] Create Date greater than or equal to "2021-01-01"	Narrowing scope to domains created in 2021  - Timothy Helming @ Thu, May 20, 2021 10:34 AM	57
3	Domain in "com-verify.site, com-validate.site" [ OR ] Registrant Organization matches "OOH" [ OR ] IP matches "198.54.115.98" [ AND ] Create Date greater than or equal to "2021-01-01"	Pivoting on the 198.54 address added domains that share characteristics with known 1151 infrastructure. Many exhibit the same general theme of cred harvesting, such as "mypayee-new-confirmation,com"  - Timothy Helming @ Thu, May 20, 2021 10:37 AM	131
4	Domain in "com-verify.site, com-validate.site" [ OR ] Registrant Organization matches "OOH" [ OR ] IP matches "198.54.115.98" [ OR ] IP matches "185.92.149.206" [ AND ] Create Date greater than or equal to "2021-01-01"	Pivoted on IP address 185.92.... Poland is one of the countries UNC 1151 is associated with, and the block-listed .pl domains tied to this IP look like they're part of the set.  This appears to be our set, for now. Other pivots showed possible badness but unlikely to be linked to UNC 1151. - Timothy Helming @ Thu, May 20, 2021 10:38 AM  This appears to be the set to act on, for now. Will continue to monitor the hash of this query for updates. - Timothy Helming @ Thu, May 20, 2021 10:39 AM	131

## About DomainTools

DomainTools helps security analysts turn threat data into threat intelligence. We take indicators from your network, including domains and IPs, and connect them with nearly every active domain on the Internet. Those connections inform risk assessments, help profile attackers, guide online fraud investigations, and map cyber activity to attacker infrastructure.

Our goal is to stop security threats to your organization before they happen, using domain/DNS data, predictive analysis, and monitoring of trends on the Internet. We collect Open Source Intelligence (OSINT) data from many sources, along with historical records, in a central database. We index and analyze the data based on various connection algorithms to deliver actionable intelligence, including domain scoring and forensic mapping.

DomainTools has over 10 billion related DNS data points to build a map of 'who's doing what' on the Internet. Fortune 100 companies, global government agencies, and leading security solution vendors use the DomainTools platform as a critical ingredient in their threat investigation and mitigation work.

For over 15 years, DomainTools has been the most popular Whois research service on the internet because we have the most comprehensive coverage of generic and country code Top Level Domains. We have also collected and stored Whois and related hosting/DNS data to provide the most complete historical records in the industry.
