ThreatQ
and DomainTools

Technology Segment: Enrichment & Analysis

DomainTools provides Cyber Threat Intelligence on Domain and DNS Infrastructure, mapping the connections between domains, IPs, SSL Certificate information, and more to enable expedited workflows during threat operations and management efforts.

With the combination of DomainTools and the ThreatQ threat intelligence platform, organizations can leverage DomainTools data in ThreatQ to correlate with additional datasets and then export it into an organization's existing security systems or ticketing systems, automating proactive threat management and mitigation.

Integration Highlights

- ⊕ Proactively Identify Threats
- ⊕ Understand Threats
- ⊕ Determine Countermeasures

ThreatQ by ThreatQuotient

ThreatQ is an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a threat library, an adaptive workbench and an open exchange to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

Iris Investigate by DomainTools

DomainTools Iris Investigate, combines the largest domain intelligence mapping with predictive risk scoring, and industry-leading passive DNS data to guide threat investigations and threat hunting. Iris Investigate enables teams with domain and DNS infrastructure intelligence for the characterization and mapping of evolving attack campaigns.

Intergration Use Cases

The Integration supports a variety of use cases such as:

- **Forensics**
- **Incident Response**
- **Threat Hunting**
- **Phishing Detection**
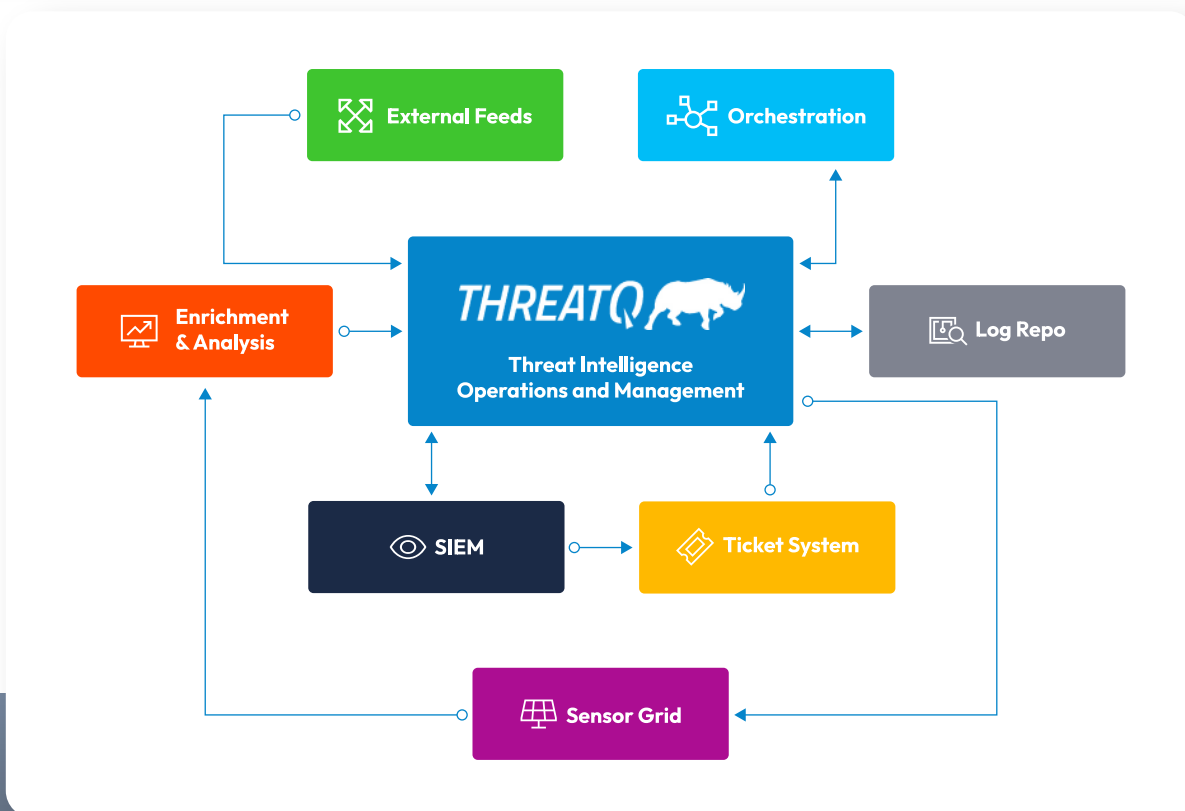

About ThreatQuotient

ThreatQuotient 's mission is to improve the efficiency and effectiveness of security operations through a threat-centric platform. By integrating an organization's existing processes and technologies into a single security architecture, ThreatQuotient accelerates and simplifies investigations and collaboration within and across teams and tools. Through automation, prioritization and visualization, ThreatQuotient's solutions reduce noise and highlight top priority threats to provide greater focus and decision support for limited resources. ThreatQuotient is headquartered in Northern Virginia with international operations based out of Europe , APAC and MENA.

About DomainTools

DomainTools is the global leader for Internet intelligence and the first place security practitioners go when they need to know. The world's most advanced security teams use our solutions to identify external risks, investigate threats, and proactively protect their organizations in a constantly evolving threat landscape.
